4007

FAMILIARISATION

EXTERIOR

Sunroof

This roof improves the ventilation and light in the passenger compartment.

» 82

Reversing camera

This equipment is activated automatically when reverse gear is engaged providing a visual return on the colour display.

» 125

Audible rear parking assistance

This equipment warns you if an obstacle is detected behind the vehicle when reversing.

» 124

Lower tailgate

This lower tailgate provides remarkable accessibility and makes the loading of bulky objects easier.

» 81

FAMILIARISATION

OPENING

Remote control key

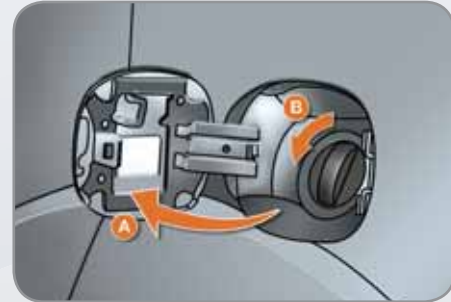

- A. Unfolding/folding of the key.
- B. Unlocking of the vehicle.
- C. Locking of the vehicle.

Manual centralised control

1. Locking of the vehicle.
2. Unlocking of the vehicle.

Fuel tank

- A. Opening of the fuel filler flap.
- B. Opening of the fuel tank cap.

Capacity of the tank: approximately 60 litres.

i When refitting the cap, insert the upper part first turning it to the right.

FAMILIARISATION

OPENING

Tailgate

Opening

- ☞ After unlocking the vehicle using the remote control or the key, press the handle **A** and raise the tailgate.

Closing

- ☞ Pull the handle **B** downwards.

Lower tailgate

Opening

- ☞ Push the handle **C** to the right and tilt the tailgate **D** gently.

Closing

- ☞ Raise the tailgate **D**, push it to close it, then check that it is secured correctly.

The maximum authorised weight on the lower tailgate when open is **200 kg**.

Spare wheel and tools

Access to the spare wheel

- ☞ Remove the plastic cover **E** to gain access to the spare wheel fixing system.

Access to the tools

The tools are stored in the storage compartment **F** in the boot right-hand trim.

FAMILIARISATION

CONFIGURING

Rear seats (row 2)

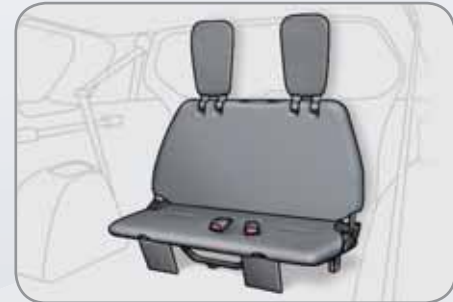

Forwards-backwards adjustment

Head restraint height adjustment

» 52

Rear bench seat (row 3)

The rear bench seat can be folded. It retracts into a location in the floor of the vehicle.

Seat back angle adjustment

» 53

Access to the third row (7-seat version)

» 54

» 58

FAMILIARISATION

INTERIOR

Automatic air conditioning

This automatic air conditioning system guarantees comfort and a sufficient circulation of air in the passenger compartment.

» 46

Audio and communication systems

This equipment benefits from the latest technology: MP3 compatible audio equipment, Bluetooth hands-free telephone, colour display...

» 162

Cruise control

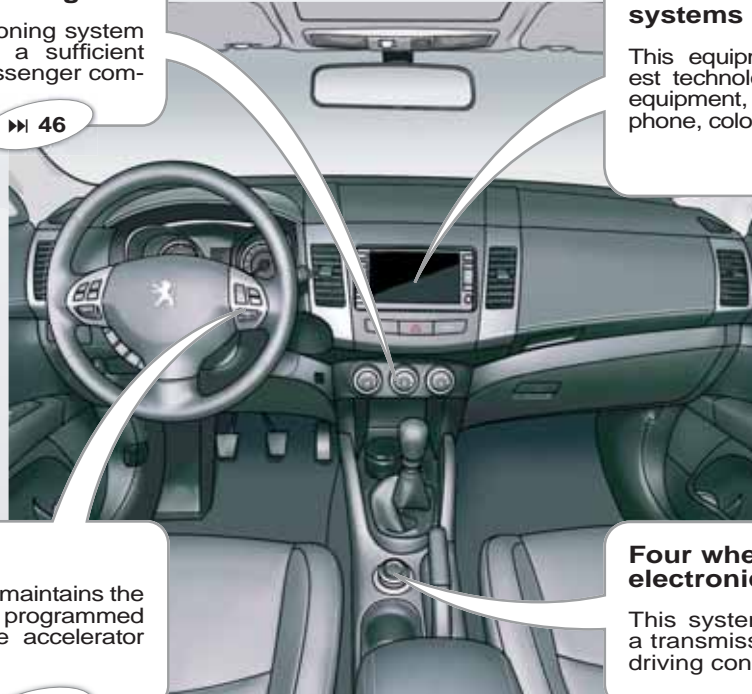

This system automatically maintains the vehicle speed at the value programmed by the driver, without the accelerator pedal being pressed.

» 122

Four wheel drive system with electronic control

This system permits the selection of a transmission mode in relation to the driving conditions.

» 120

» 19, 20

Warning lights

When the ignition is on, the orange and red warning lights come on.

When the engine is running, these warning lights should switch off.

If warning lights remain on, refer to the page concerned.

» 21

Detection of fastening of the driver's seat belt

When the **ignition is switched on**, the **seat belt warning light** comes on accompanied by an audible signal if the driver has not fastened his seat belt.

The warning light switches off when the seat belt is fastened.

» 23

Controls bar

A. Passenger air bag disarmed warning light.

» 110

B. Hazard warning lights switch.

» 103

C. Front passenger's seat belt not fastened or unfastened warning light.

» 107

KEEPING YOUR PASSENGERS SAFE

Front passenger air bag

1. Insertion of the key.
2. Selection of the "OFF" position.
3. Removal of the key.

Child lock

This prevents opening of the door concerned from the inside.
Lower or raise the control **A** to lock or unlock.

Isofix mounting

Two rings **A**, located between the seat back and seat cushion of the vehicle's seat, permit the securing of a child seat.

A ring **B** permits securing of the upper strap referred to as the **TOP TETHER**.

» 110

» 102

» 99

FAMILIARISATION

DRIVING SAFELY

Four wheel drive system

Three transmission modes are available and can be selected manually by the driver in accordance with his requirements:

- A. Two wheel drive (2WD),**
- B. Four wheel drive (4WD AUTO),**
- C. Four wheel drive (4WD LOCK),**

Also...

You can change transmission mode when stationary or when driving at a speed below 60 mph (100 km/h).

Cruise control

This maintains a constant vehicle speed programmed by the driver.

1. **"ON/OFF"** button: activation/deactivation of the cruise control mode.
2. **"COAST SET"** button: storing of a driving speed then decreasing of the cruising speed.
3. **"ACC RES"** button: increasing of the cruising speed and recalling of the stored speed.
4. **"CANCEL"** button: switching off of the cruise control.

In order to be programmed or activated, the vehicle speed must be higher than 25 mph (40 km/h) with at least second gear engaged.

Audible rear parking assistance

This detects any obstacle (person, vehicle, tree, gate,...) located behind the vehicle.

The vehicle is fitted with four sensors:

- D.** two side sensors.
- E.** two central sensors.
