Familiarisation

Exterior

Keyless Entry and Starting
This system allows you to unlock, lock and start your vehicle while keeping the key on your person and in the defined zone.

Stop & Start
This system puts the engine temporarily into standby during stops in the traffic (red lights, traffic jams, etc...). The engine restarts automatically as soon as you want to move off. The Stop & Start system reduces fuel consumption and exhaust emissions, and offers the comfort of complete silence when stationary.

Parking space sensor
This system measures the size of a space and advises whether parking is possible.
Exterior

Front and rear parking sensors
This system provides a warning when manoeuvering forwards and backwards by detecting obstacles located in front of or behind the vehicle.

Motorised tailgate (SW)
This system provides motorised opening and closing of the tailgate, by pressing a button.

Temporary puncture repair kit
This kit is a complete system consisting of a compressor and a sealant cartridge, to allow the temporary repair of a tyre.
Familiarisation

Open

Remote control key

A. Unfolding/Folding the key.
B. Unlocking the vehicle.

Unlocking
With the electronic key on your person and in the defined zone, pass your hand behind the door handle to unlock the vehicle, then pull on the handle to open the door.

Fuel tank

1. Opening the fuel filler flap.

Keyless Entry and Starting system

Other functions...
C. Normal locking of the vehicle.
Vehicle location.

Locking
With the electronic key in the defined zone, press with a finger on the door handle (at the markings) to lock the vehicle.

2. Opening and hooking the fuel filler cap.
Tank capacity: approximately 72 litres (or 55 litres according to version).
Interior

Head-up display
This system projects speed and cruise control/speed limiter information onto a lightly smoked strip in the driver’s field of vision, so that they do not need to take their eyes off the road.

Interior mood lighting
This subdued passenger compartment lighting improves visibility inside the vehicle in low lighting conditions.

Audio and communication systems
These systems benefit from the latest technology: MP3 compatible audio systems, USB player, Bluetooth hands-free system, satellite navigation system with colour screen, auxiliary inputs, Hi-Fi audio system, ...

Satellite navigation system

Audio system
If your 508 is fitted with a JBL Hi-Fi audio system, this is designed specifically for the passenger compartment of your vehicle.

Digital air conditioning
After setting the desired level of comfort, the system then automatically controls this level according to the exterior climatic conditions.

Sitting comfortably

**Front seats**

**Manual adjustments**
1. Head restraint height and angle adjustment.
2. Backrest angle adjustment.
4. Lumbar support adjustment.
5. Seat forwards-backwards adjustment.
6. Cushion adjustment.

**Electrical adjustment**
1. Angle, seat height and seat forwards-backwards adjustment.
2. Backrest angle adjustment.
3. Lumbar support adjustment.
Instruments and controls

1. Cruise control/speed limiter controls.
2. Headlamp height adjustment.
3. Lighting and direction indicator stalk.
4. Instrument panel.
5. Driver's airbag.
   Horn.
7. 12 V accessory socket
   USB port/auxiliary socket.
8. Bonnet release lever.
10. Front door window demisting/defrosting vent.
12. Steering lock and starting with the key.
13. Starting using the electronic key.
15. Wiper/screenwash/trip computer stalk.
16. Central locking and hazard warning buttons.
17. Multifunction screen.
18. Central adjustable air vents.
20. Side adjustable air vents.
21. Glove box/Passenger’s airbag deactivation.
22. Electric parking brake.
23. Central armrest with storage.
24. Upper and lower storage.
25. Audio system.
Familiarisation

Sitting comfortably

**Head restraint adjustment**

To lower it, press button A. To raise it, guide the head restraint upwards to the desired position. To incline it, swivel the lower part backwards or forwards.

**Steering wheel adjustment**

1. Release the adjustment mechanism.
2. Adjust for height and reach.
3. Lock the adjustment mechanism.

**Heated seats control**

0: off.
1: low.
2: medium.
3: high.

For reasons of safety, these operations must only be carried out with the vehicle stationary.
Sitting comfortably

Door mirrors

Adjustment
1. Selection of the mirror.
2. Adjusting the position of the mirror glass.
3. Deselection of the mirror.

Rear view mirror

Manual day/night type
1. Selecting the “day” position of the rear view mirror.
2. Rear view mirror adjustment.

Automatic day/night type
1. Automatic detection of day/night mode.
2. Rear view mirror adjustment.

Front seat belts

Fitting the belt.
2. Fastening.
3. Check that the belt is correctly fastened by pulling on the belt webbing.

Other functions...
Folding/Unfolding.
Familiarisation

Seeing clearly

Lighting

Ring A
- Lighting off.
- Automatic illumination of headlamps.
- Sidelamps.
- Dipped/main beam headlamps.

Ring B
- Front and rear foglamps.

Wipers

Control stalk A: windscreen wipers
1. Normal wipe.
2. Fast wipe.
0. Park.
Int. Intermittent wipe.
AUTO Automatic wiping.
↓ Single wipe: Brief pull on the stalk towards.
Screenwash: Long pull on stalk towards you.

Switching on "AUTO" mode
Briefly push the stalk downwards.

Switching off "AUTO" mode
Briefly push the stalk downwards or place the stalk in another position: Int, 1 or 2.

Ring B: rear wiper
- Park.
- Intermittent wipe.
- Screenwash.

</tbody>
</table>

**Digital air conditioning:** use of the fully automatic mode by pressing the "AUTO" button is recommended.
Familiarisation

Monitoring

Instrument panel

On switching on, the dial needles go to the extent of their travel then return to 0.
A. With the ignition on, the needle should indicate the fuel remaining.
B. With the engine running, the associated low level warning lamp should go off.

C. With the ignition on, the instrument panel screen should indicate the level of oil.
If the levels are not correct, top up the level which is low.

Warning lamps

1. With the ignition on, the orange and red warning lamps come on.
2. With the engine running, these warning lamps should go off.
If a warning lamp remains on, refer to the page concerned.
Passenger safety

Front passenger’s airbag

1. Open the glove box.
2. Insert the key.
3. Select position: "ON" (activation), with front passenger or "forwards facing" child seat, "OFF" (deactivation), with "rear facing" child seat.
4. Remove the key keeping the switch in the new position.

Front seat belts and passenger's front airbag

A. Front seat belts not fastened or unfastened warning lamp.

B. Front passenger’s airbag deactivation indicator lamp.

C. Front passenger's airbag activation indicator lamp.
Familiarisation

Driving safely

Stop & Start

Going into engine STOP mode

The "ECO" warning lamp comes on in the instrument panel and the engine goes into standby; with an electronic gear control gearbox and speeds below 4 mph (6 km/h), press the brake pedal or put the gear lever in position N.

In certain circumstances, the STOP mode may not be available; the "ECO" warning lamp flashes for a few seconds, then goes off.

Going into engine START mode

The "ECO" warning lamp goes off and the engine restarts with an electronic gear control gearbox:

- with the gear lever in position A or M release the brake pedal,
- or with the gear lever in position N and brake pedal released, move the gear lever to position A or M,
- or engage reverse.

In certain circumstances, START mode may be invoked automatically; the "ECO" warning lamp flashes for a few seconds, then goes off.

Deactivation/ Reactivation

You can deactivate the system at any time by pressing the "ECO OFF" button; the button's warning lamp comes on.

The system is automatically reactivated every time the engine is started with the key.

Before refuelling or doing anything under the bonnet, you must switch off the ignition with the key.
Driving safely

**Speed limiter "LIMIT"**

1. Selecting speed limiter mode.
2. Decrease the programmed value.
3. Increase the programmed value.
4. Pause/resume speed limiter.
5. Speed limiter off.

The values must be set with the engine running.

**Cruise control "CRUISE"**

1. Selecting cruise control mode.
2. Decrease the programmed value.
3. Increase the programmed value.
4. Pause/resume cruise control.
5. Cruise control Off.

In order to be programmed or activated, the vehicle speed must be higher than 25 mph (40 km/h), with at least 4th gear engaged on a manual gearbox (2nd gear on an electronic gear control or automatic gearbox).

**Display in the instrument panel**

The cruise control or speed limiter mode appears in the instrument panel when it is selected.
