

Dear Customer

You have just taken possession of your rechargeable (plug-in) hybrid vehicle. **This brochure contains a few practical explanations to allow you to use this vehicle easily.**

Your vehicle has a conventional petrol engine and a battery with a **power capacity of up to 13.2 kWh***.

It will offer you a **range** of up to 55 km in full electric mode and can be recharged like an electric vehicle in several different ways.**

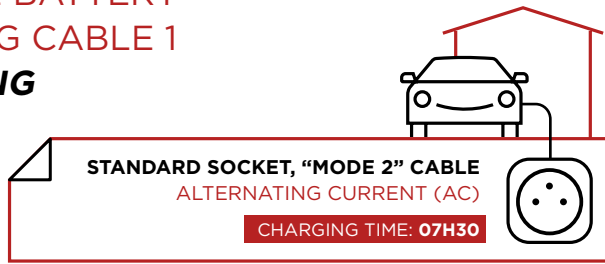

* The power of the batteries is 11.8 kWh for the Peugeot 508 and 13.2 kWh for the other models.

** The range provided by the electric battery can vary from 40 to 55 km depending on the weight of the vehicle's load, the type of driving adopted and the use of equipment with high energy consumption such as the air conditioning or the heating.

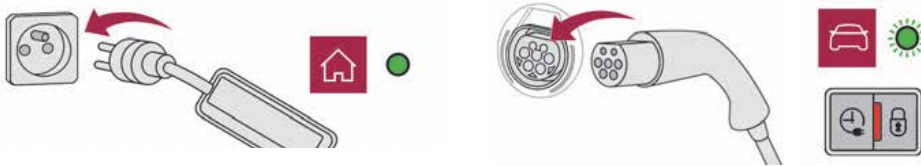

CAR-2-EUROPE

RECHARGE THE BATTERY BY CONNECTING CABLE 1 **HOME CHARGING**

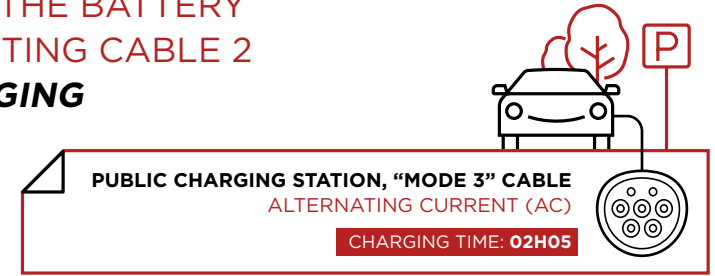

- **Open the charging port** by pressing the button at the top right of the port.
- The luminous guides in the port **light up in white**.
- Connect **the cable on the box side to the domestic socket and then on the vehicle side**.
- **The luminous guides** and the "CHARGING" indicator on the control box **flash in green**.
- Immediate charging is engaged.
- **The charging connector is locked in the port** and the red indicator lights up.

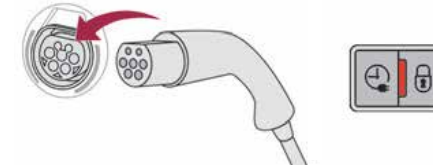

+

RECHARGE THE BATTERY BY CONNECTING CABLE 2 **FAST CHARGING**

- **Follow the instructions for use** of the public charging station.
- **Connect the cable on the vehicle side**.
- **The luminous guides** and the "CHARGING" indicator on the control box **flash in green**.
- Immediate charging **is engaged**.
- **Upon locking of the vehicle the charging connector is locked** in the port and the red indicator light comes on.

+

DISCONNECTION OF THE CABLE WHEN CHARGING IS COMPLETE

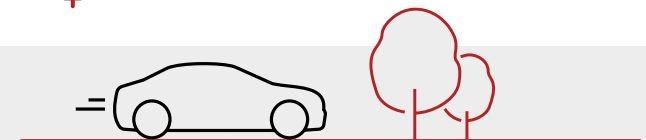

- **Unlock the vehicle to unlock the charging connector** from the charging port (the red indicator goes out in the port).
- Within 30 seconds, **remove the charging connector and unplug the cable and put it away**.

+

FULLY CHARGE THE BATTERY **WHILE DRIVING**

When you use the e-SAVE function, **the engine rotates the electric motor which is in the gearbox to recharge the battery** until the programmed energy level is reached. **With this function, the battery can be fully recharged (e-SAVE Max position).**

○

+

You need to drive 2 km on average to recover 1 km of range (or 100 km on the motorway to recover 50 km of range). Once the set level is reached, the system switches to hybrid mode and maintains the level in the battery at the required threshold (10 km, 20 km or Max).

FIND A PUBLIC CHARGING STATION WHICH CORRESPONDS TO YOUR VEHICLE

- Thanks to the **Free2move Services “Charge my car”** application offered to you by **CAR-2-Europe**, you can **find public charging stations on your route or at your stopovers** which will allow you to charge the vehicle quickly.
- **Access to more than 100,000 stations in many countries in Europe:** France (including Corsica), Belgium, Germany, Austria, Switzerland, Italy, Spain, Portugal.
- The card supplied to you will allow you to **pay for charging** provided that you enter the number of your bank card in the Free2move Services application.

TO BENEFIT FROM FREE2MOVE SERVICES “CHARGEMYCAR”

- 1 Download the application **FREE2MOVE SERVICES**

- 2 Create your account

- 3 Activate your card

- 4 Add your vehicle

DOWNLOAD THE APPLICATION

Download the app **FREE2MOVE SERVICES** on:
